

3Visions Ophthalmology

Your Office Visit

Thanks for choosing us as your guide to better eye health and care of your vision. We welcome you to our eye care family and hope we can be partners in bringing wellness and care to your vision.

What to bring with you:

- Your insurance cards
- Your prefilled registration forms or please arrive 15 minutes prior to your visit to complete them in the office
- Your current eye drops or a list
- Your current glasses
- A list of all your current medications you may be taking (even non eye-related ones)

What to expect:

Expect to be in the office for about 2 hours, where you will receive a complete, comprehensive evaluation, including a dilated retina exam.

After registration, you will be seen by a technician for specialized measurements and diagnostic imaging and then you will be examined by Dr. Evans.

A shorter more abbreviated initial consult may be arranged in special circumstances but would require a second follow up visit for further testing and pupil dilation.
